

Shubham Gagare

Product Designer | shubhamgagare.space

Started my career as Software Engineer but now looking to utilize and leverage product designing ,problem-solving, design thinking, and creativity skills towards the growth of the company.

Experience

Volante Technologies

March 2019 – present

Software Engineer

Volante is a global provider of cloud payments and financial messaging solutions. As a designer and developer, my core activity includes:

- Designed and developed an in-house web application - automation regression tool(ART).
- Gathering and evaluating new testing requirements in collaboration with the QA team.
- Designed a UX for the core profiles of the automation regression tool.
- Redesigned UX allowed testers to save countless hours and to scale automated test cases.
- Worked closely with Product Managers, Business Analysts, and the QA team.

Big Market

Feb 2021 – April 2021

UX Design (Freelance)

Online grocery shopping mobile application.

- Gathering and evaluating user requirements.
- Conducted user research and interviews.
- Explored new mobile app features in low-fidelity wireframes.
- Developed system design and deliver high fidelity UI,
- Redesigned existing UIs to better adapt android and ios devices.
